- Collaborates with external specialized security service providers to perform thorough penetration tests on the Bank's IT systems
- Provides support to the security information systems daily operation of and promptly addresses hardware and software issues to maintain optimal functionality
- Collaborates closely with development and operation managers for the design and implementation of Information Security Policies and Frameworks ensuring compliance with the regulatory framework
- Stays abreast of international trends in security technology, analyzes developments and makes recommendations for the optimal utilization of modern IT technologies in information security

### Qualifications:

- Bachelor's degree in computer science or related fields
- Postgraduate degree in a relevant field of study will be considered an asset
- Very good command of the English language, both written and spoken
- Excellent computer skills and proficiency in MS Office applications
- **Minimum of 3 years** of demonstrated similar professional experience
- Familiar with various operating systems and network components, especially those commonly used in networking environments (Windows, Linux, LDAP, DNS, RADIUS, NTP, Domain Controllers etc.)

- Any knowledge or experience in products such as Fortigate, Symantec Products, F5, Imperva WAF or other relevant experience OT/ IoT security will be considered as plus.
- In-depth knowledge of firewall technologies, network protocols and security architecture
- Project Management knowledge underpinning the ability to orchestrate security initiatives
- Strong understanding of the developments in the digital market and artificial intelligence along with In-depth knowledge of security and technology risks
- Consistency and organizational acumen along with a results-driven mindset, dedicated to achieving and exceeding established security objectives
- Flexibility and adaptability in a fast-paced working environment
- Keen interest in continuous learning, enabling effective navigation and a commitment to staying ahead of emerging trends and technologies in the ever-evolving field of IT security.

## **About CrediaBank**

CrediaBank was created through the merger of Attica Bank and the former Pancreta Bank and is the 5th largest bank in Greece in terms of assets. It is a modern banking institution with a network of 66 branches and 5 business centers across the country, serving approximately 300,000 individuals and businesses with a wide portfolio of deposit, investment, and insurance products, mutual funds, loans, and brokerage services. Customer service is a top priority for CrediaBank, which is why it is the only bank that welcomes customers both with and without appointments, offers cashier services available throughout the day, and operates with extended hours through the CrediaConnect service. CrediaBank operates as a credit institution supervised by the Bank of Greece, strictly applying both European and national regulatory frameworks governing the operation of banks. More information about the Bank is available on our website [www.crediabank.com](http://www.crediabank.com)

## **We respect your personal data**

CrediaBank, taking into account that the personal data of candidate employees is of great importance, informs you in accordance with Regulation (EU) 2016/679 and the relevant provisions of the applicable Greek legislation for the protection of personal data, in its capacity as controller of the type of personal data it collects, the reason they are collected and processed and how long they are retained [here](#).

## **Equal Opportunity Employer**

CrediaBank believes that its strength lies in its people and promotes a safe, dignified and inclusive working environment with zero tolerance for any form of discrimination, violence or harassment. We review all applications with equality, transparency and respect for human rights.
