"5-Star" Solutions for Hotel Businesses from CrediaBank

A comprehensive banking and business approach that upgrades every modern hotel business

CrediaBank is presenting, for the first time, comprehensive "5-star" solutions that meet the daily financial needs of hotels and tourist accommodations across Greece. By combining banking and insurance services, financing, and smart business tools, CrediaBank decisively contributes to upgrading the operation of tourism businesses.

Among the features of CrediaBank's new everyday banking solutions is the "Prime Business" current account, offering an interest rate of 1.15% on amounts up to €50,000, zero fees on incoming transfers, and a 50% discount on outgoing transfers until 30.06.2026.

At the same time, the new partnership with epay provides modern POS services with customized pricing for every business need. The payment experience is enhanced from payment processing to reservation management through integration with the most popular cash register systems and online booking engines, creating an ideal solution for the needs of the sector.

CrediaBank's range of solutions is further complemented by the comprehensive "Payroll Plus" program, which provides each employee of your business with a payroll account offering a favorable interest rate and access to more than 2,500 ATM points. In addition, hotel businesses can also benefit from an insurance package with full coverage for buildings, contents, civil liability, POS transactions, and cyberattacks, backed by the reliability of recognized insurance companies.

CrediaBank's financing tools offer favorable terms, with no application processing fees until 30.06.2026. They cover development investments (expansion, energy upgrades, and renovations), with access to co-financed and guarantee programs such as TEPIX III and InvestEU, ESF funding actions, and POS working capital financing—ideal for periods of increased liquidity needs.

CrediaBank is making a strategic entry into the tourism sector, supporting one of the key pillars of the real economy in Greece. CrediaBank's "5-star" solutions stand by every hotel business with the aim of improving operational efficiency, saving time and

resources, reducing operating costs, strengthening liquidity, and overall enhancing the guest experience.
